Professional Summary

Frontend-focused Software Engineering student at RMIT with hands-on full-stack experience building and launching real-user web applications. Skilled in Next.js, TypeScript, React, Supabase, PostgreSQL, API integration, authentication, and deployment. Experienced in technical leadership, product iteration, and maintaining reliable user flows for MVP-stage products.

Education

RMIT University Vietnam

Bachelor of Engineering (Software Engineering)

Expected Graduate: April 2027

Relevant Coursework: Data Structures & Algorithms, Web Development, Database Systems, Software Engineering Architecture & Design, Introduction to AI, Full-stack Development, Software Engineering: Process & Tools.

Experience

RMIT NCT Club

Technical Leader - Backend

Ho Chi Minh, Vietnam

Nov 2025 – April 2026

- Led 3 backend developers in building an event management platform for 40+ club members.
- Built Express.js and Supabase services for event, user, and registration workflows.
- Coordinated API contracts with front-end developers to support smooth integration.

Project Pluto

Technical Leader

Ho Chi Minh, Vietnam

April 2026 – Current

- Led technical execution and delivery of **Project Luvcraft**, managing a team of 4 developers.
- Applied agile practices and conducted code reviews to ensure high-quality, maintainable code.
- Translated high-level project goals into scalable technical solutions.
- Designed scalable PostgreSQL schemas with Row-Level Security (RLS) to enforce data isolation and privacy.

Projects

Lab68dev Platform | [Unikorn](#) | [GitHub](#) | [Website](#)

Next.js • TypeScript • Supabase • PostgreSQL • Vercel

Full-stack Developer

- Built an open-source developer workspace for project planning and documentation management.
- Served 30+ active users across project tracking and documentation workflows.
- Improved maintainability with reusable components, API service layers, and shared utilities.
- Automated deployment through GitHub Actions and Vercel.

Lab68 CV Builder | [Unikorn](#) | [GitHub](#) | [Website](#)

Next.js • TypeScript • PostgreSQL • Gmail OAuth • Groq AI API

Full-stack Developer

- Launched an AI-powered CV builder, reaching #1 Product of the Day on Unikorn and #1 Product of the Week on Forge.
- Gained 50+ active users organically within the first month.
- Built responsive CV creation flows with Gmail OAuth, Supabase auth, and Groq AI-powered writing suggestions.
- Improved reliability across key flows including auth, CV editing, loading states, and API errors.

Skills & Interests

Technical Skills

- **Frontend:** React, Next.js App Router, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Responsive Design.
- **Backend & Database:** Node.js, Express.js, Spring Boot, Supabase, PostgreSQL, REST APIs.
- **Tools & Deployment:** Git, GitHub, Docker, Vercel, GitHub Actions, Postman.
- **Engineering Practices:** API Integration, Authentication, OAuth/JWT, Row-Level Security, Code Review, Agile/Scrum, Basic QA & Edge Case Testing.

Languages

- **Vietnamese:** Native
- **English:** Fluent Professional Working Proficiency

Interest

- Frontend Engineering, Product Development, Web Performance, Developer Tools, Open-source Projects.

Certifications

- [Enterprise Design Thinking Practitioner – IBM | 2025](#)
- [Frontend Developer \(React\) Certificate – Hackerrank | 2025](#)
- [Software Engineering Certificate – Hackerrank | 2025](#)
- [Project Management Fundamental – IBM | 2026](#)
