PROFESSIONAL SUMMARY

Software Engineering student at RMIT University, full-stack developer, and solution architect who has led engineering teams from design to delivery, including a Distinction-awarded capstone. Strong in TypeScript, Next.js, Express.js, and PostgreSQL, with experience in C4 modeling, design patterns, and AI-assisted tooling.

EDUCATION

RMIT University Vietnam — Expected Graduation: April 2027
Bachelor of Engineering, Software Engineering — Ho Chi Minh City, Vietnam
Capstone Project (Project Pluto): **Distinction (DI)**.

TECHNICAL EXPERIENCE

Project Pluto (Capstone Project) [Showcase] — April 2026 – September 2026
Full-Stack Engineer – Team Lead

- Led technical delivery of Project Luvcraft across a team of 4 developers through capstone completion, earning a **Distinction (DI)**.
- Designed PostgreSQL schemas with Row-Level Security and the API contracts between frontend and backend; set up sprint planning and pull request reviews.

RMIT NCT Club — November 2025 – May 2026
Backend Developer – Core Contributor

- Led 3 developers to build an event management platform, defining API contracts and database schemas.
- Engineered Express.js and Supabase services for user management and role-based access control (RBAC).

PROJECTS

H1T Micro – Nutrition & Micronutrient Platform [Live] | Start-up Project, Full-Stack Engineer, Next.js, Go, Supabase, PostgreSQL

- Designed the system architecture and technology stack, and deployed the platform to production at lehongkhanh.vn.
- Own the product as Product Owner: define the backlog, prioritise features, and drive the roadmap toward commercial launch.

Sukajan Random Phi Truong [Live] | Full-stack Developer, Next.js, TypeScript, PostgreSQL, Prisma, Supabase, SePay

- Built a full-stack online clothing store for a client with a team of 3, delivered from planning to production on Vercel in 3 weeks.
- Implemented a bilingual (Vietnamese and English) storefront, SePay deposit checkout, Supabase authentication, and an admin panel for product and order management.

PUDO Code System [GitHub] | AI-assisted Development, Prompt Engineering, Developer Tooling

- Achieved #2 Product of the Day and #3 Product of the Week on Unikorn, plus #1 Launch Batch Winner on Forg.to.
- Built CLI-installable agent rules, PR templates, prompt libraries, and quality gates for AI-assisted development.

Lab68CV Builder [Live] [GitHub] | Full-stack Developer, Next.js, TypeScript, PostgreSQL, Gmail OAuth, Groq AI

- Launched an AI-powered CV builder that reached #1 Product of the Day on Unikorn with 50+ organic active users.
- Built CV creation flows with Gmail OAuth, Supabase auth, and AI writing suggestions.

TECHNICAL SKILLS

Frontend: React, Next.js App Router, TypeScript, JavaScript, Tailwind CSS.
Backend & Database: Node.js, Express.js, Spring Boot, Supabase, PostgreSQL (RLS).
Tools & Deployment: Git, Docker, Vercel, GitHub Actions, Postman, AI Coding Assistants.
Practices: C4 Modeling, Design Patterns, API Design, OAuth and JWT, Agile and Scrum, Code Review, QA Testing.

CERTIFICATIONS

IBM Enterprise Design Thinking Practitioner, 2025 | HackerRank Frontend Developer, 2025 | IBM Project Management, 2026
